Projects

MEDAPulse
Github (Ruby on Rails, PostgreSQL, hosted on Ninefold)
Winning project for the Smart Money Hackathon. Our team of four partnered with the Mission Economic Development Agency, offering free financial services to low and moderate income families in San Francisco. This app enables MEDA's financial coaches to better track their clients' financial progress and provide better metrics of success for their potential funders. Our team will continue to fully develop this application for full functionality and will compete nationally against winners in four other states.

Climb
Github (Ruby on Rails, PostgreSQL, RSPEC)
Lead developer for the winning project for the FinCapDev Hackathon. This app assists low-income users to manage their bills when funds are insufficient. We will fully develop this as a web app and a native android app to compete nationally.

Book Meetups
Github (Ruby on Rails, Javascript, PostgreSQL, hosted on Heroku)
Final project for Dev Bootcamp. This app uses geolocation to track proximity of users with similar taste in books and integrates the Google Books API to crowdsource the seeding of the book database. The design is hand-crafted CSS and responsive, with Javascript and AJAX for select form requests.

Technical Skills

Ruby	HTML5	Git	Agile Workflow
Javascript	CSS3	Github	Object Oriented Programming
Python	SQL	Bash	Adobe Photoshop & InDesign
Ruby on Rails	MySQL	Rspec	Test Driven Development
Active Record	PostgreSQL		

Education

Dev Bootcamp - San Francisco — Jan-Mar 2014
Clocked over 1000 hours of coding. Ruby on Rails and Javascript emphasis, employing MVC, OO, and Agile workflow. Gained understanding of frameworks and libraries through custom projects mirroring real world applications. Heavy focus on engineering empathy and self-driven learning.

San Francisco State University - San Francisco — 2006-2009
International Relations — 3.7 GPA
Researched intellectual property rights of indigenous societies, mainly in Latin America and Africa. Heavy focus on the interaction between first world industrial societies and third world communities.

Universidade Federal do Ceara - Fortaleza, Brazil — Summer 2004
Cultural Exchange Program

Relevant Experience

Social Media Management, Web Design — 2012-2013
Independent Contractor, San Francisco
Web and graphic design services for various clients. Social media marketing, community outreach, strategic marketing consultation.

Volunteer Editor, Intern — 2009, 2012-2013
Kiva.org, San Francisco
Worked with the Partnerships Team and the Loan Editing Team to further Kiva's objective to empower third-world entrepreneurs with micro-financing.

Assistant Manager — 2011
MKTG Productions & Google Chromebook, San Francisco
Worked side-by-side with the Chromebook UI/UX team. Incited a passion for intuitive user experience and design. Required in-depth technical knowledge of the product.
